EXAMINER'S AMENDMENT

The applicant's response filed 2/20/2004 has been entered. Claims 59-62 are pending.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Raymond J. Harmuth on 5/24/2004.

2. The application has been amended as follows:

In claims 59, step (C), line 2, after "biological activity of the polypeptide", insert --, thereby identifying the herbicide --.

In claims 61, step (C), line 2, after "biological activity of the polypeptide", insert --, thereby finding the herbicide --.

3. The following is an examiner's statement of reasons for allowance:

Concerning claims 59-62, no prior art has been found teaching or suggesting the method of identifying a herbicide or finding a herbicide comprising contacting a host cell including a polypeptide which has the biological activity of a phosphomevalonate kinase and comprising an amino acid sequence having at least 80% identity with the sequence according to SEQ ID NO: 2, with a chemical compound or mixture of chemical compounds which permit the interaction of the chemical compound or the mixture of chemical compounds with the polypeptide, comparing the biological activity of the polypeptide in the presence of the chemical compound with the biological activity of the polypeptide in the absence of the chemical compound and determining

Art Unit: 1637

the chemical compound which specifically modulates the biological activity of the polypeptide thereby identifying or finding the herbicide.

The closest prior art is the reference of Astrazeneca et al. (WO 01/145533). Astrazeneca et al. disclose the phosphomevalonate kinase (PMK) gene (ERG8) from *Candida Abicans*. The invention relates to the methods for its expression yielding PMK protein and to the assays for identifying inhibitors of the enzyme (See pg. 1, lines 5-10). Astrazeneca et al. do not disclose contacting the host cell which includes a polypeptide having the biological activity of a phosphomevalonate kinase and comprising an amino acid sequence having at least 80% identity with the sequence according of SEQ ID NO: 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is 703 (305) 7112. The examiner can normally be reached on Monday - Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703 308 1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
